Passionate Software Developer Aspired to pursue career opportunities in Software Engineering with an organization of repute.

Profile Summary

➢ Proficient in **Angular, Typescript**

➢ Excellent knowledge of **JavaScript** (ES6), HTML5, CSS, REST, etc.

➢ Good knowledge of Java , SQL, GIT

➢ Exposure in the Software Development Life Cycle (**SDLC**).

➢ Ability to learn quickly and to apply new tools and technologies.

➢ Having **Excellent communication** and **interpersonal skills**.

Internship

Samsung R&D Institute India | Intern   **Mar 16, 24 to May 15, 24**

- Enhanced an open-source chart library in Angular:
  Added click interactions on chart SVG elements.
  Integrated additional UI layers for better readability.
  Implemented selectability features for charts.

- Collaborated with the development team for seamless integration.
- Utilized Angular and TypeScript for front-end development.
- Resolved technical issues and ensured robust application performance.

Oasis Infobyte | Intern   **Apr 03, 23 to June 02, 23**
- Developed the front end of a vegetable selling website based on provided designs.
- Developed practical skills in front-end web development, focusing on building key components of websites using HTML, CSS, and JavaScript.
- Demonstrated proficiency in creating responsive designs, ensuring optimal viewing experiences across various devices.

Educational Qualification

Bachelor of Technology from **Institute of Engineering & Management, Kolkata**
08/2020-05/2024
Computer Science & Engineering
DGPA: 9.38

12th Grade (2020)
Progressive Central High School
Percentage: 92.2

10th Grade (2018)
City Central High School
Percentage: 90.6

Awards and Achievements

- ➢ Head Boy in School , CR in College.
- ➢ Secured Rank 1 in the 1st Year at College.
- ➢ Winner of PCRA National Quiz competition.
- ➢ Interschool kabaddi Champion.
- ➢ NPTEL certification for DBMS & Social Networks.
- ➢ AWS Cloud Practitioner Essentials - Coursera

Technical Skills

Languages	**JavaScript, Java, Python**
DBMS	**SQL**
Operating Systems	Unix/Linux, Windows Family
Frameworks	**Angular, Rest , Spring-boot**
Web Related	HTML, JavaScript, CSS,
Ide or editors	VsCode, Intellij IDE,
Computer Fundementals	**Data Structure & Algorithm, Java(OOPS), Cloud Computing**

Projects Profile

Hospital Management System Project

Role Summary:

- **Position:** Full Stack Developer
- **Technologies Used:** Angular, HTML, CSS, JavaScript, Spring Boot, Java, MySQL

Work Summary:

- **Front-End Development:** Created user-friendly interfaces using Angular, ensuring smooth interaction for doctors and admins.
- **Back-End Development:** Utilized Spring Boot and Java to develop robust server-side logic and integrate with MySQL for data management.
- **Collaboration:** Worked closely with a multidisciplinary team to ensure the system met all functional requirements.

Project Summary:

- Developed a Hospital Management System to enhance healthcare management for doctors, Patients and admins.
- Empowered doctors to view and manage patients, including diagnostic details, and perform CRUD operations on patient records and medicine lists through an Angular-based user interface.
- Provided admins with a comprehensive dashboard to maintain appointment lists, perform CRUD operations, and oversee patient details with restricted access to sensitive diagnostic information.

Banking System Project

Role Summary:

- **Position:** Full Stack Developer
- **Technologies Used:** Spring Boot, Angular

Work Summary:

- **Front-End Development:** Created responsive and intuitive user interfaces using Angular.
- **Back-End Development:** Utilized Spring Boot and Spring Security for secure account operations and transaction management.
- **Collaboration:** Worked closely with team members to design and implement comprehensive banking functionalities.

Project Summary:

- Designed and implemented a comprehensive Banking System using Spring Boot and Angular, focusing on secure account creation, transactions between accounts, and transaction history review.
